Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 26 April 2006.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

This office action is in response to applicant's remarks filed April 28, 2006.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. It is unclear how a resist layer is further narrowed by the limitation "a material of absorbing moisture." [Emphasis mine]. The phrase appears grammatically incorrect. For examination purposes the limitation is understood to mean a material for absorbing moisture or that is capable of absorbing moisture¹.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Applicant's Admitted Prior Art (APA).

APA (Fig. 7A-D) discloses:

¹ Examiner recommends incorporating claim 2 into claim 1 and using the suggested language "a material for absorbing moisture." If properly claimed, the amendment may be given favorable consideration.

(cl. 1) a pattern formation method comprising the steps of: forming a resist film (2) made from a resist material capable of absorbing moisture² performing pattern exposure by selectively irradiating (4) said resist film with exposing light while supplying immersion solution (3) onto said resist film; and forming a resist pattern (6) by developing said resist film after the pattern exposure (Applicant's Pg. 7).

Response to Arguments

Applicant's arguments with respect to claims have been considered but are moot in view of the new ground(s) of rejection³.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The prior art discloses most notably in Matsuo (U.S. 6,120,974) the patterning of a water absorbing resist.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to James M. Mitchell whose telephone number is (571) 272-1931. The examiner can normally be reached on M-F 8:00-4:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Carl Whitehead Jr. can be reached on (571) 272-1702. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

² For example, cited art Matsuo et al (U.S. 6,120,974) discloses process for making polymer resist water absorbing.

³ Again, applicant is reminded pursuant to 37 CFR 1.121 that his response must include the correct status identifier (withdrawn, currently amended etc.) for each claim must be cited, or applicant's response will be held as an intentional non-responsive. No further warning will be given.
